

**D + CONNECT**

**YOUR SYSTEMS ARE JUST A CLICK AWAY**

---

**PRICE LIST 2019**

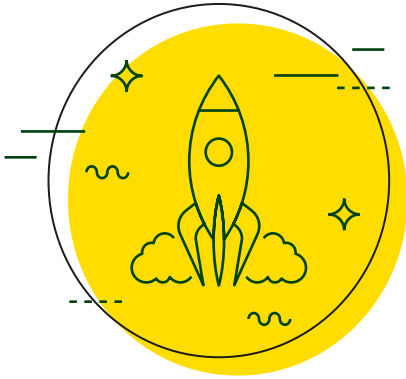

Compact and quick and easy to install, the D.Connect box is suitable for any system and does not require any infrastructure. All you need is an internet connection. You can connect up to 8 products in a few minutes and then monitor them, without changing any settings.

**D+ CONNECT**  
**READY**  
**IN A**  
**HEARTBEAT**

## READY TO USE

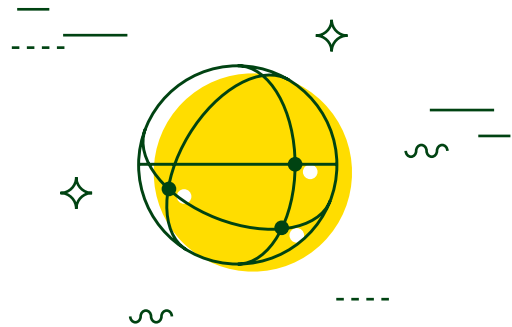

## THE SERVICE THAT MAKES LIFE EASIER

The D.Connect makes monitoring of all DAB products easier and more intuitive than ever, and it takes seconds to adjust the main settings, even remotely. For total control without surprises.

## IMMEDIATELY READY TO USE

D.Connect does not require any particular infrastructure for installation: you only need an internet connection and a smartphone. Configuration takes just a few simple guided steps.

## TECHNOLOGY FOR EVERYONE

Based on state-of-the-art technology, the D.Connect system offers many advantages over typical BMS systems.

## UNRIVALLED ADVANTAGES

### D.Connect

#### TAILORED DESIGN

Developed for both residential and commercial building service application.

#### USE

No fixed work station is required as the D.Connect is all about portability... the only thing you need is a internet connection.

#### SOFTWARE & HARDWARE

You do not need to buy any expensive software, nor do you need to pay for updates or for dedicated work stations.

#### VALUE

It lowers the overhead costs, increasing the value of your building.

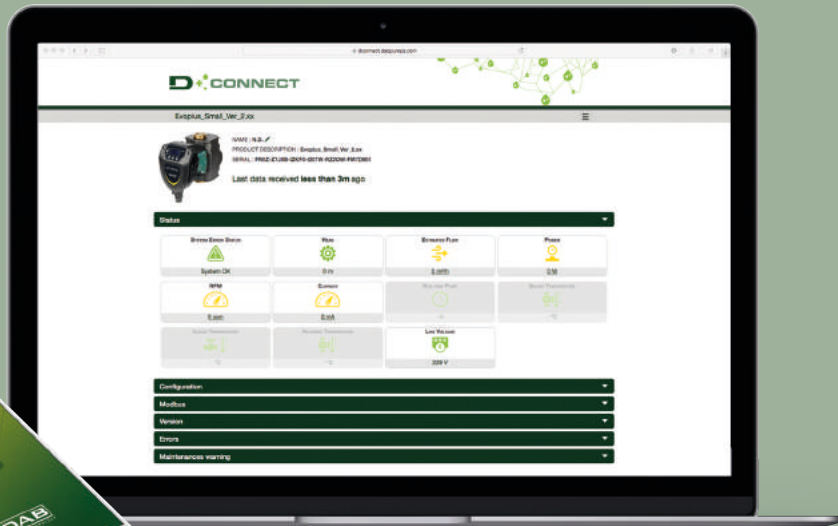

# D.Connect BOX

The compact electronic device can be used to easily connect to a wide range of DAB products, both new and already installed. The only thing required is a wired connection on site and you're set to go!

## MOBILE & DESKTOP

Download the App from the App Store or Google Play, or visit the site **dconnect.dabpumps.com**, and you're ready to view the connected installations on the network and check their individual settings. The user interface couldn't be clearer and more functional; it brings all the data you need right to your fingertips.

## SAFETY

Like any other items in our life connected to the Internet, water pumps are also at risk of cyber-attacks.

For years, DAB has been developing a Cybersecurity culture to guarantee safe and protected solutions for our customers.

D.Connect hardware and software components have been tested following the most stringent international protocols.

At DAB, the attention to the customer needs is also demonstrated by the preventive actions and the informed choices implemented in relation to security, with the object of protecting our most advanced technological solutions.

Appropriate choices during the design stage, keeping a high attention level and continuously releasing updates, is DAB's way of protecting the customer.

### D.Connect REQUIREMENTS

#### SMARTPHONE OR TABLET

- Android 4.4.2 "KitKat" or higher.
- IOs 9 or higher.
- Access to the Internet.

#### PC

- Web Browser supporting Java script (e.g. Internet Explorer version 8.0 or higher, Firefox version 7.0 or higher, Google Chrome).
- Internet connection.

### NETWORK REQUIREMENTS

- Permanent active Internet connection.
- Wi-Fi and/or LAN modem/router; active DHCP service.
- In case of Wi-Fi, good quality Wi-Fi signal in the D.Connect Box installation area.  
In case of weak signal, we recommended the use of a Wi-Fi signal repeater.

## A SINGLE INTERFACE FOR EVERY APPLICATION

The D.Connect system can be used in all the main fields of application: from pressurisation systems to circulation systems, from waste water recovery installations to swimming pool filtering systems.

It is a multi-channel service of high added value that can be used with any system, irrespective of its nature and size and in the same environment and with the same instruments.

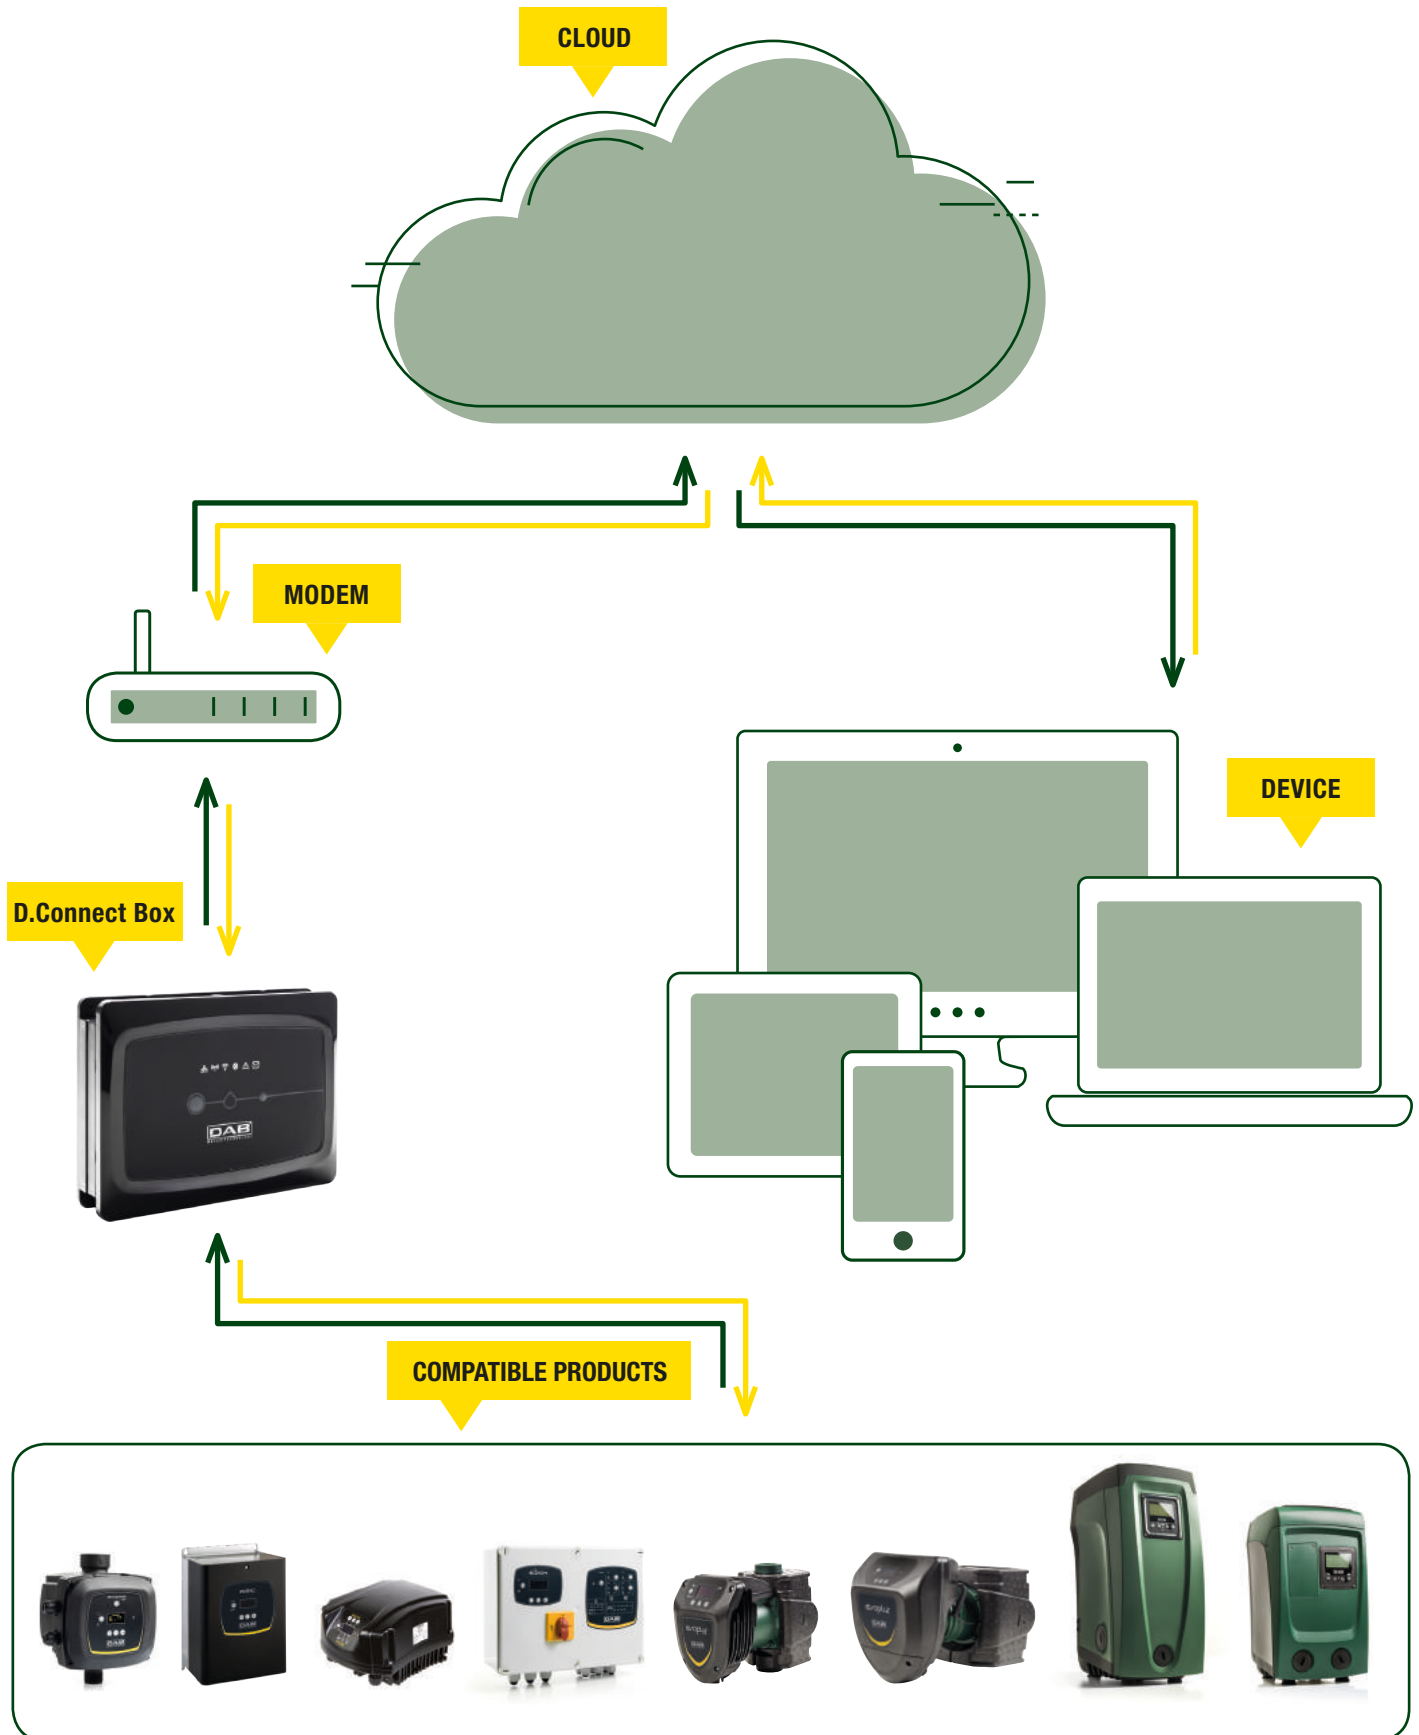

Being modular, D.Connect can manage up to 8 different installations in a highly simple and integrated manner.

## SMART BUILDING MANAGEMENT

D.Connect permits easier, controlled and more rational management of the system, lowering the overhead costs and increasing the absolute value of the building in terms of efficiency and overall comfort.
